    178 -- "Send Message" --> 180((Results 180))
    180 -- "Send Results URL" --> 178
```

The diagram illustrates the process of generating a simple method code. It starts with a box labeled "XML defining method interface 170". An arrow labeled "Generate Service Access Code" points down to a box labeled "Generated Simple Method Code 172". From this box, an arrow labeled "Call Method" points left to an oval labeled "Client Application 176". From the "Client Application 176", an arrow labeled "Generated Proxy Reference" points right to a box labeled "Results Proxy (Generated) 178". From the "Results Proxy (Generated) 178", an arrow labeled "Send Message" points right to a large oval labeled "Service". Inside the "Service" oval is a smaller oval labeled "Results 180". From the "Results 180", an arrow labeled "Send Results URL" points left back to the "Results Proxy (Generated) 178".
